

Call for Resumé and Paper Abstract

NORSMA 12 28. – 29. October 2026 in Oslo deals with important questions about mathematics and special education in the Nordic countries, where theories, empirical results and experiences from practice are presented. We are through this announcement interested in both results from development and research already finalized, experiences from on-going work, and ideas for future collaboration. We are also interested in theoretical contributions to fundamental issues as what is meant by special needs education in mathematics and as how to characterize being in difficulties in mathematics.

Summary of development work or presentation of a research project:

- A summary of a development and/or research project of maximum 300–400 words excluding any references (See NORSMA Template)
- Summary (A) can be written in Nordic language or English
- Summary to be submitted electronically via <https://nettskjema.no/a/601129>
- Deadline for submission of summary is April 10, 2026

Summary will all undergo a review process. Approved summary will be published in the programme of the conference.

The review approved summary is required for presentation at the NOSMA conference.
