

Hva skjer når vi kjører dette programmet?

```
when green flag clicked
  delete all
  pen down
  go to x: -50 y: -130
  set heading 90
  pen up
  ask "Hvor mange kanter skal figuren ha?" and wait
  set "antall kanter" to svar
  repeat (antall kanter) times
    go 100 steps
    turn 360 / antall kanter degrees
```

Hvorfor blir det riktig å snu  $360 : \text{antall kanter}$ ?
