

Studer programmet

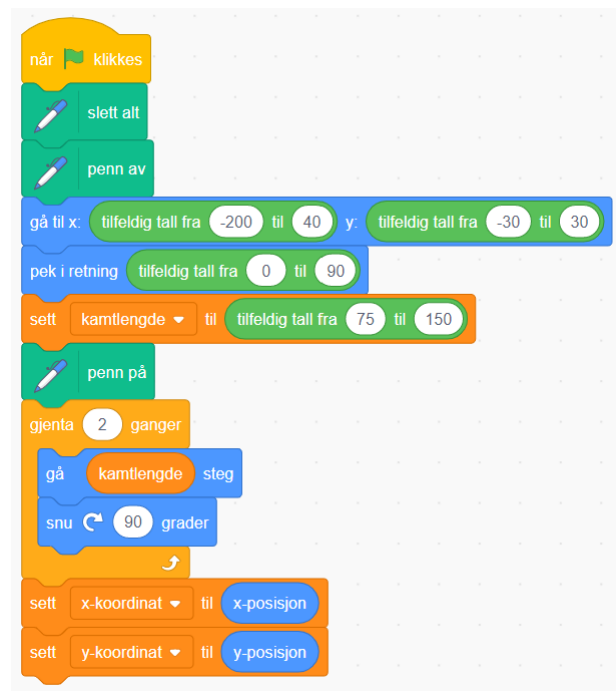

```
when green flag clicked
  clear all
  pen down
  go to x: random number from -200 to 40 y: random number from -30 to 30
  point in direction random number from 0 to 90
  set line length to random number from 75 to 150
  pen up
  repeat 2 times
    go kamtlengde steps
    turn 90 degrees
  set x-coordinate to x-position
  set y-coordinate to y-position
```

Hva gjør de to siste kodeblokkene?

Fullfør programmet slik at det tegner et kvadrat med en diagonal.
